

# TOGAF 9.1 for Professionals

<b>Certificate</b>	The course prepares for the <i>TOGAF 9 Combined Foundation &amp; Certified</i> exam
<b>Duration</b>	4 days
<b>Course Delivery</b>	Classroom, Virtual Classroom
<b>Language</b>	English

## Overview

The TOGAF 9 for Professionals course introduces you to TOGAF, the world's leading open standard framework for Enterprise Architecture.

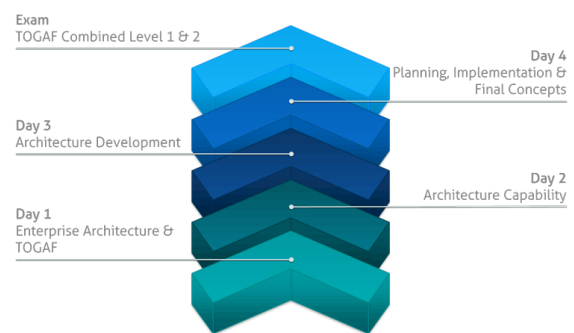

Fully compliant with accredited course requirements, the course covers the TOGAF 9.1 Framework prepares you for the internationally recognized TOGAF 9.1 certification with The Open Group.

## Course Duration and Format

The course is a 4-day hands-on classroom training event, delivered by a senior professional enterprise architecture consultant with extensive of real-world experience from enterprise architecture and transformation programs to share with learners.

Far beyond the information needed to certify as a TOGAF architect, the course is packed with exam guidance, quizzes, real-world examples of architecture project outputs, and an intensive business case study simulation with exercises that helps professionals to work with enterprise architecture and TOGAF | practice after the training and any certification, back at the job.

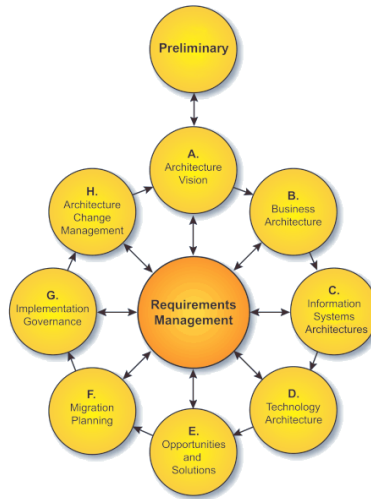

The course covers all learning outcomes for TOGAF courses and prepares the student to sign up for and sit the *TOGAF 9 Combined Part 1 and Part 2* (Foundation and Certified) exam and achieve the *TOGAF 9 Certified* certification.

## Course Contents

The course teaches all parts of the TOGAF 9.1 Framework required for accredited TOGAF 9 courses:

- The process for doing Enterprise Architecture called the **Architecture Development Method (ADM)**
- A range of **guidelines and techniques** for using and tailoring the ADM
- The **Architecture Content Framework** to describe structured and coherent architecture

- The **Architecture Repository and Enterprise Continuum** to organize architecture information
- **Reference Models** that accelerates and standardizes architectures
- Creating and managing an **Architecture Capability**: Architecture Governance, organization, skills and maturity
